

8 . Rate security of Computerized system of recording compared to traditional paper based recording.

25 responses

Give suggestion on increasing security for computerized system.

25 responses

Consulting a cyber security specialist while building the system

System must have password protection

Keep password

Having strong password and asking for permission for any editing job

Use of cards for access should be minimized Access management should focus more on fingerprints and passcode access

Anything.

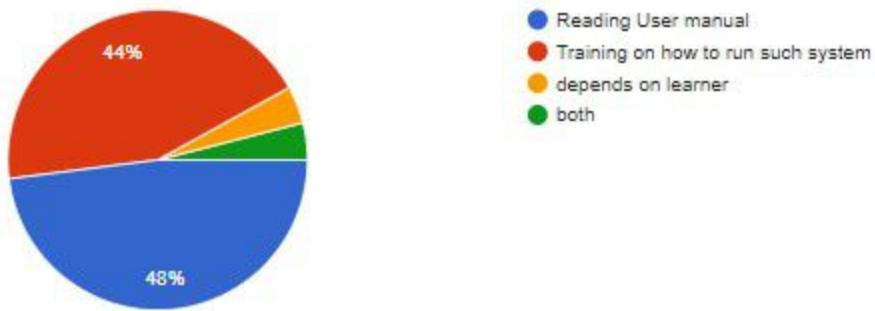

Installing antivirus and anti spy ware software

To improve security in computerized system at first network security should be established .

keep password

What will you prefer to be familiar if you have to switch to digital system from traditional manual system?
